

MTCU daily letter infotrac setup upgrade

Inbox x infotrac x infotrac/mtcu x

Le Tuan La

Nov 12

to printprocess.i., Terrence, David, Anil

DSI,

Please set up infotrac and add extended tracking for MTCU daily letters.

1) Also please convert letter code to 3 digit code

Example:

mtcudla.control -> mtcudl001.control
MTCUDLA.dfa -> MTCUDL001.dfa

mtcudlb.control -> mtcudl002.control
MTCUDLB.dfa -> MTCUDL002.dfa

| Naming Convention: | Type: | Letter | enotice | New notice number |
|--------------------|--|--------|---------|-------------------|
| AAOXMMDD.STM | ACH Overdraft Xfer Notice | A | Y | 001 |
| LNTERMMDD.STM | Termination of Private Mortgage | B | Y | 002 |
| CLANMMDD.STM | Loan Access Notice | C | Y | 003 |
| DOXNMMDD.STM | Overdraft Xfer Notice | D | Y | 004 |
| LNPMIINTMMDD.STM | Private Mortgage Insurance Disclosure | E | Y | 005 |
| FPDNMMDD.STM | Past Due Notice | F | Y | 006 |
| GIFNMMDD.STM | Insufficient Funds Notice | G | Y | 007 |
| HCMNMMDD.STM | Certificate Maturity Notice | H | Y | 008 |
| ILRCMMDD.STM | Loan Rate Change/Payment Change | I | Y | 009 |
| AAOZMMDD.STM | ACH Overdraft Xfer Notice #2 | J | N | 010 |
| CLAOMMDD.STM | Loan Access Notice #2 | K | Y | 011 |
| CLAPMMDD.STM | Loan Access Notice #3 | L | Y | 012 |
| FPDOMMDD.STM | Past Due Notice #2 | M | Y | 013 |
| HCMOMMDD.STM | Certificate Maturity Notice #2 | N | Y | 014 |
| OVDTMDD.STM | Overdraft Notice | O | Y | 015 |
| LNBLMMDD.STM | Loan Bill | P | Y | 016 |
| ATM?MMDD.STM | Overdraft Notice #2 (Letter gets generate every hour) | Q | Y | 017 |
| REGDMDD.STM | RegD Notice | R | Y | 018 |
| LNEAMMDD.STM | Final Escrow Analysis | S | Y | 019 |
| REGEMMDD.STM | Change to Premium Overdraft Service | T | N | 020 |
| CARDCOMPMMDD.STM | Compromised Card | U | Y | 021 |
| FGCMMDD.STM | FGC(Feel Good Checking) Conversion | W | N | 022 |
| REGDLTRMMDD.txt | Reg D Letter | X | Y | 023 |
| FGCREJMMDD.stm | FGC Rejection Letter | Y | Y | 024 |
| LN_EAS.STM | Yearly Escrow Anaylsis | Z | Z | 025 |

2) Modify and add the following flags in mtcudla.control file (this is the main control file for all letters) .

```
infotrac="m"
track_by_rec="y"
estmt_trac="y"
mail_full_serv="ASE3" (change ASE1 to ASE3)
newDIStructure="y1"
new_e_index=1
print_dfa="2SDSDAILYN" (change 2SDSDAILY to 2SDSDAILYN )
e_automate="e4" (change e to e4)
```

```

procdate=`grep PROC_DATE: ${home_ins}/insert/${cid}${jid}.ins | cut -d " " -f2`

if [ $1 -a $1 != "format" ]; then
  if [ $2 ]; then
    cycleno=${jid}${2} grep PROC_DATE: ${home_ins}/insert/${cid}${jid}.ins | cut -d " " -f2 | cut -c3-4`
  else
    cycleno=${jid} grep PROC_DATE: ${home_ins}/insert/${cid}${jid}.ins | cut -d " " -f2 | cut -c3-4`
  fi

  fn="$dir$cid$cycleno"
  prefix="$cid$cycleno"
  sam_jid="dl"
  supprefix="$cid$cycleno"
fi

export dir procdate cover_ovl fn sam_jid supprefix

```

- 3) For **mtcudl001.control**, **mtcudl002.control**, ..., **mtcudl025.control** (subcontrol files) do the following:

clone mtcudla.control to create mtcudl001.control
 then in mtcudl001.control,
 change:

```

jid="dla" -> jid="dl001"
format_dfa="MTCUDLA" -> format_dfa="MTCUDL001"
remove print_dfa="2DSDAILY" from all subcontrol files

```

- 4) For **MTCUDL001.dfa**, **MTCUDL002.dfa**, ..., **MTCUDL025.dfa**

Update TXT record

 letter code (312-314)
 afp code (315-317)

- 5) Add infotrack and change letter code in script **mtcu_process.sh**, [mtcu_process.pl](#)
Do not create your own script. Just modify these 2 scripts.
Please see attached pdf for example on how to set up infotrack in the script.

All the files you need to update and change are in **/d/infotps3/Vend_DSI/client_pickup/print_process/MTCU/Daily/**
 When you are done, please test in development environment. Let me know if you have any questions. Thanks.
